# My_MDs
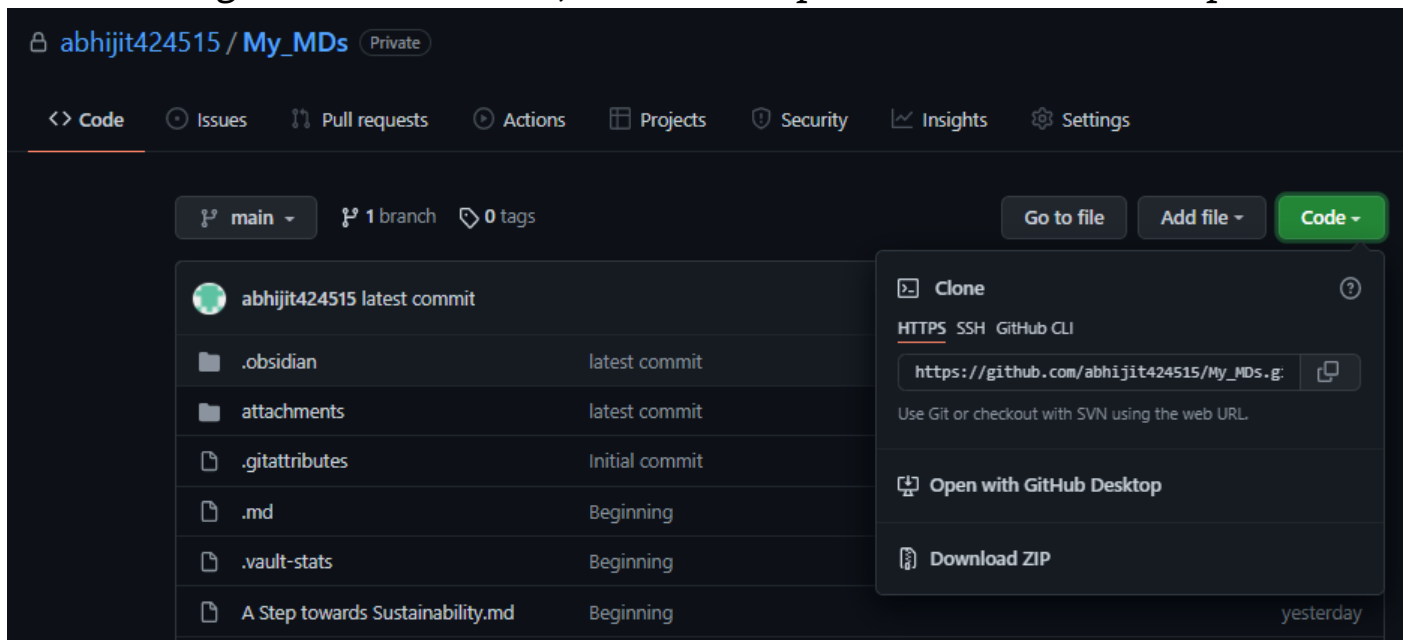

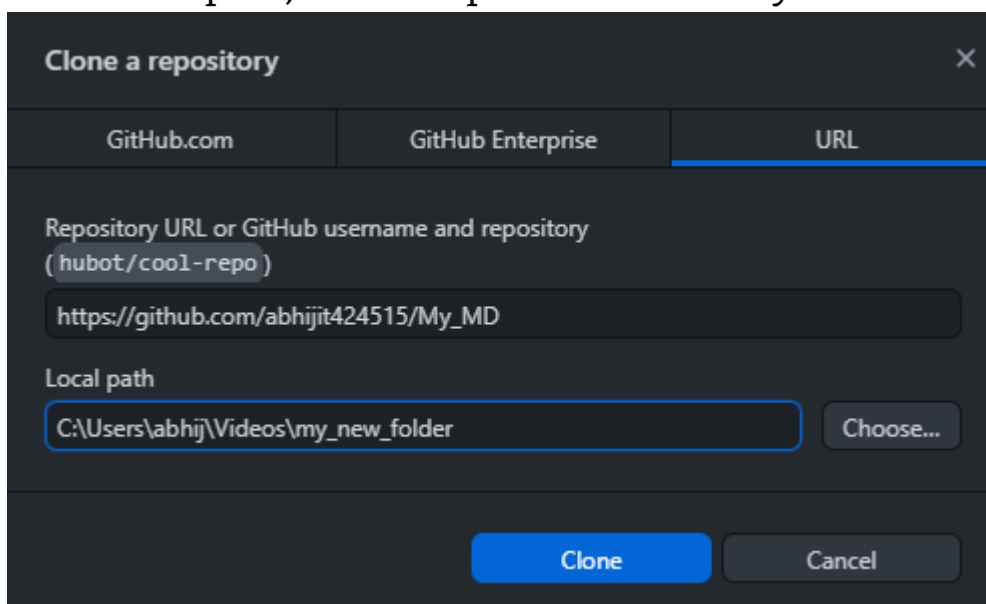

my Obsidian markdown files

## Steps to ~~view~~ collaborate to the notes ⇒
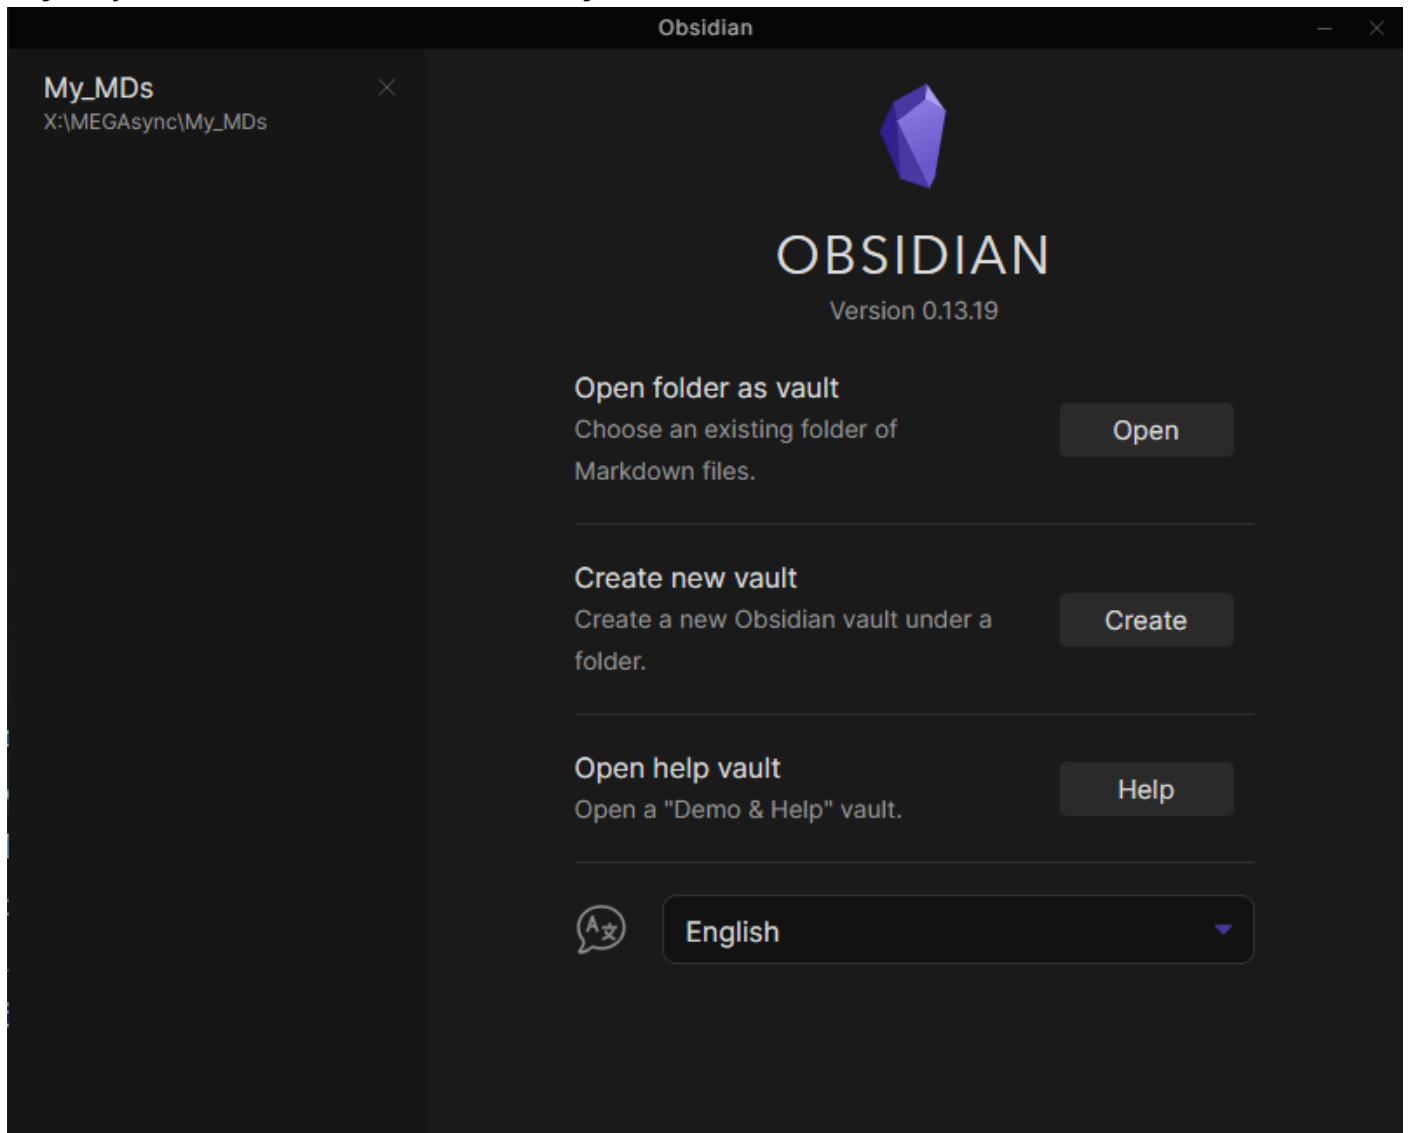

1. Download Obsidian and GitHub Desktop, and install them.
2. If you downloaded this repository earlier as a zip file and extracted it into a folder, delete both the zip file and the folder, as I have updated the repo.
3. Create a new folder.
4. Open Github Desktop app, and then either sign-in with your Github account, or make a new one if you don't have one.
5. Go to my repo: https://github.com/abhijit424515/My_MDs
6. Click on the green button "Code", and select "Open with Github Desktop"

7. In the local path, enter the path of the folder you made

8. Click Clone button

9. After cloning is complete, open Obsidian.

10. If you just downloaded Obsidian, you will see this window

My_MDs
X:\MEGAsync\My_MDs

OBSIDIAN

Version 0.13.19

**Open folder as vault**
Choose an existing folder of
Markdown files.

Open

**Create new vault**

folder.

Create

**Open help vault**
Open a "Demo & Help" vault.

Help

English

11. Choose Open folder as Vault, and navigate to and choose that folder you made.

12. If prompt to turn off safe mode, then turn it off.

13. Use the notes, collaborate your own stuff, and enjoy

We will discuss over this and some extra stuff after you finish the above steps.
